

Enhanced disclosure on Vanguard funds cost and charges information

Vanguard is required to provide information on costs and charges incurred within Vanguard funds to Distributors and other Intermediaries so that they can include this within the costs and charges information that they must disclose to their clients. Intermediaries will usually have other costs relating to the services they provide and therefore the information which we provide is only part of the total. We have set out the costs and charges information relating to Vanguard funds in this document in order that Investors who may not have used an Intermediary and others can have access to it.

The presentation and allocation that we have applied follow the MiFID II Regulations (Annex II of the Commission Delegated Regulation C(2016) 2398). The Regulations allow different approaches to be used to calculate Transaction costs and this may mean that meaningful comparison of these costs with those of another provider is difficult. We have calculated Transaction costs using the methodology, "Transaction Costs for New PRIIPs" as defined within the EU regulations (Commission Delegated Regulation 2017/653).

The information provided in this document is for general information only and does not take into account objectives, financial situation or needs of an individual investor. You should obtain financial advice that is tailored to your personal circumstances from a licensed financial adviser.

- 1. Ongoing charges figures:** The Ongoing Charges Figure (OCF) covers management fees and service costs such as administration, audit, depositary, legal, registration and regulatory expenses incurred in respect of the funds.
- 2. Ongoing costs:** All ongoing costs and charges related to the management of the fund that are deducted from the value of the fund. This includes OCF, overdraft fees and securities lending fees.
- 3. One-off costs:** All costs and charges paid to fund providers at the beginning or at the end of the investment in the fund. This includes front-loaded management fee, structuring fee and distribution fee. Vanguard does not currently have any one-off costs.
- 4. Transaction costs:** All costs and charges incurred as a result of the acquisition and disposal of underlying investments within the fund. This includes broker commissions, entry and exit charges, spreads, stamp duty, transactions tax, and foreign exchange costs. (Please note that when rounded to 2 decimal places, transaction costs less than 0.01% will be displayed as 0.00%).
- 5. Incidental costs:** Performance fees and anything similar. Vanguard funds have no incidental costs currently.
- 6. Total fund costs:** This is the total of the ongoing costs, one-off costs, transaction costs and incidental costs of investing in the fund.

The report is dated 24 July 2020. The transaction costs data is at 31 December 2019. This document is an operational communication and should not be regarded as a financial promotion. This document is designed for use by, and is directed only at persons resident in Austria, Denmark, Finland, France, Germany, Guernsey, Jersey, Liechtenstein, Luxembourg, Netherlands, Portugal, Spain and Sweden.

Please note the Funds below are a sample representation of Vanguard funds that are available. The full list of Vanguard funds can be found on our website www.global.vanguard.com see the Vanguard European MiFID II Template (EMT).

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Some funds invest in securities which are denominated in different currencies. Movements in currency exchange rates can affect the return of investments.

The Vanguard Global Enhanced Equity Fund; Vanguard Emerging Markets Bond Fund; Vanguard Global Credit Bond Fund, may use derivatives, including for investment purposes, in order to reduce risk or cost and/or generate extra income or growth. For all other funds they will be used to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall. Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

ETF shares can be bought or sold only through a broker. Investing in ETFs entails stockbroker commission and a bid-offer spread which should be considered fully before investing.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds. For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>
