RISK DESCRIPTION

Investment in the Fund involves a degree of risk. There is no guarantee that the Fund's investment objective, or its risk monitoring, will be achieved and results may vary substantially over time. The Fund's investment strategy may carry considerable risks. The value of investments and the income from them, can go down as well as up and an investor may not get back the amount originally invested. Investing in REITs (Real Estate Investment Trusts) is not equivalent to investing directly in property. Performance of property securities may be more dependent on the performance of stock markets than the property sector. The sale of appreciated properties depends upon market demand. Please see overleaf for further details.
